www.5starproducts.co.nz

From humble beginnings to large-scale paint supply...

Five Star Products Ltd was established in 1988 and is a proud New Zealand manufacturer of water based art paints, dyes, inks, glues and other products in our Christchurch factory. Our company philosophy is being "responsive, innovative, solution finders", providing the right solutions for our customers.

Five Star Products Ltd represents five star quality. We strive to deliver great service and quality products and as part of this we research, develop, formulate and test all new and existing manufactured products. Over the years our brands have become widely recognised in the educational sector.

Five Star Products Ltd is committed to minimising the negative environmental impacts of our business activities and as part of this we joined the Enviromark programme back in 2006. Five Star Products Ltd is a Toitu Enviromark Gold certified organisation. This is a recognised Environmental Management Standard which is audited annually by a third party.

As part of our environmental initiatives, we now supply some our products in 100% NZ post-consumer kerbside collected recycled milk bottles. A major benefit of using these bottles is no virgin plastic is used in manufacturing these bottles. And, they can also be recycled again! Our environmental packaging displays our Eco Packaging logo.

Black

Ideal for calligraphy

Startex Textile Ink Fabric Painting Ink

1 Litre

375ml

Heat Setting Required

Colourfast textile ink for fabric painting and printing. Easy heat-set process for permanence. Apply by brush, stencil or screen. Suitable for painting and printing designs on T-shirts, pillowcases, cushions and table cloths.

Handy Hints:

Sample test fabric to ensure suitability - most fabrics require laundering to remove sizing. When mixed with clear medium depth of colour can be reduced without affecting the performance. The addition of water should be done sparingly as this will affect fastness properties.

HEAT SETTING:

Allow colours to dry overnight.

Dryer: Place in dryer on a hot setting for 45 minutes (large item). Allow to age for 48 hours, then repeat the process.

Iron: Place fabric paint side up between clean papers (no printed papers) iron on a hot setting, constantly moving to prevent burning for a minimum of 4 minutes (small T-shirt).

Textile Painting Accessories

Printing Screen Nylon Mesh

This mono filament nylon mesh is used for replacing damaged printing screens. The mesh size is 43T
Size: 1350X1200mm

Printing Screen

A wooden printing screen with a monofilament 43T mesh. Dovetailed corners on the screen to eliminate the risk of warping. Replacement mesh available.
Size: 400 x 400mm

Flint Water Based Printing Ink

Professional Grade
High pigment loading
with good coverage

115ml tubes

Professional water-based printing ink with good coverage and printing properties. Can be successfully applied to a variety of different surfaces such as paper card, stretched canvas, wood metal, plastic acetate glass. Safe alternative to oil-based inks.

HELPFUL HINT: In cold weather, stand the tube in warm water for 3-4 minutes to assist in squeezing out the ink and making rolling out easier.

Flint Oil Based Printing Ink

Viscous oil-based ink that dries to a glossy sheen
Produces good coverage and printing properties
Suitable for use on a variety of printing surfaces

100ml tubes

Oil Based Printing Ink

Traditional, viscous, smooth, oil based rolling ink. Dries to a glossy sheen. Print on paper, wood, canvas. Has good coverage and printing properties which can be successfully applied to a variety of different surfaces.

Made in New Zealand

Lino Rollers

Sizes: 50mm, 63mm, 75mm & 100mm

Dense hard wearing rubber lino roller with a moulded plastic handle. Use for all types of printing.

5 Star Artist Printing Ink - Waterbased

115ml tubes

- Quick drying and waterproof once dry
- Mixable colours
- Cleans up in water

High-quality water-based printing ink with a smooth texture, good consistency and coverage. Fully intermixable colours are easy to roll with a fast drying time. Safe alternative to oil-based inks. A clear medium (transparent white) is available to reduce the depth of tone for tonal work. Print on paper, card, canvas, wood, metal, plastic and acetate glass.

Lino Cutting Board

A sturdy, laminated wooden board designed to hook over the edge of a desk to allow safe cutting of lino, wood or other tiles for printmaking. The board offers a flat surface to cut on and measures 300 x 300 mm overall. Please note: take care when using cutting tools.

Quick and Easy to use

1.Score out your design in the Printing Foam

2.Use Printing Ink on paints to create your colourful artwork

Printing Foam

Small Pack: 10 sheets of 190 x 130 mm
Large Pack: 10 sheets of 280 x 190 mm

Economic, soft surface printing sheet of polystyrene. Easy to use for water-based printing ink textile inks and water-based paints. Produces fine detailed lines and patterns which can be reproduced an unlimited number of times. No cutting tools are required. Simply score the surface with a pointed pencil or similar. An excellent introduction to printmaking for the younger age group. Available in two sizes.

Concentrated
Just add Water

50ml
All colours
60 per carton

Mosaic made with Liquid Dye & Black 3D Creative Paint

- Once diluted, use as a painting dye.
- Ideal for screen printing when added to Cellulose Paste or All Purpose Paste.

Five Star Liquid Dye is a concentrated water soluble dye in liquid form which is ready to be diluted to the desired depth of tone. It can be used for screen printing when added to Cellulose Paste or All Purpose Paste. Note: The image shown is the concentrated colour.

Size: 50ml Bottle

3D Creative Paint

3D Effects

Create high-build colourful 3D-like pictures and also used to create window stickers, leadlight effects or even use as coloured glue. Bright glossy finish in a range of colours, including gold and silver. Use directly from the bottle with the easy application spout. Use on paper, card, wood, stone, fabric foil* glass* plastic* and ceramics* (*may release from non-porous surfaces when dry).

Blackboard Paint

Indoor use only
Cleans with soap and water
Erases cleanly.

Size: 125ml

Blackboard Paint is a water based paint that converts surfaces into a usable chalkboard. Apply to metal, wood, masonry, drywall, plaster, glass, concrete, unglazed ceramics and hardboard.

IMPORTANT: All blackboards require "dressing" before use. This ensures the surface will wipe clean with a duster. The instructions are:

1. Use the entire length of a stick of white chalk to rub across the whole surface of the board. Your board should have a complete coating of chalk.
2. Wipe the chalk off with a duster or dry cloth.
3. It's now ready to use!

NOTE: If you clean your blackboard with a damp cloth at any stage, you may need to dress the board again.

Linseed Oil, Turpentine & Odourless Solvent

Sizes:
1 Litre, 250ml & 60ml

Artists' Refined Linseed Oil

Use to reduce the consistency and slow the drying of oil colours. Use to increase transparency and gloss of oil colours.

Sizes:
250ml & 60ml

Artists' Distilled Turpentine

Natural gum turpentine for diluting & improving drying of oil colours. Use to clean equipment after using oil based products.

Sizes:
1 Litre, 250ml & 60ml

Odourless Solvent

Use to clean equipment after using oil based products. Low toxicity & low fume level. Safer alternative to traditional turps for use in the studio and classroom.

Gesso Primer

Water based Non-Toxic

Size: 1 Litre
12 per carton

Size: 375ml
12 per carton

Fast drying water based white primer and sealer used to prepare paper board wood and canvas prior to painting. Can be used under acrylic and oil paints and is also suitable for corrections over acrylic paints. Gesso primer is opaque and can be tinted using Five Star acrylic paints. Can also be diluted or sanded

Black

White

Shellac

Traditional universal sealer for varnishing artwork and sealing screen printing unfired clay and plaster. Doesn't dry clear. Apply by brush or pad. Mix dry flakes with methylated spirits.

MIXING INSTRUCTIONS:

100 g Shellac + 400 ml Meths = 400 ml

250 g Shellac + 1 litre Meths = 1 litre

Leave until thoroughly dissolved (stir occasionally) then strain liquid into another container.

Cold Wax Plaster Roll

Water-based Non-Toxic

Cold Wax Solution

Ready to Use - Non-Toxic

500ml
24 per carton

**A safer alternative
with no fumes**

Ready to use water soluble resist wax. Used as a resist for water colours inks and dyes. Successive colour layers can be applied using the batik method. Air dries quickly and is a safer alternative with no fumes. Can be used for screen printing with paints inks dyes. Suitable on paper clay screens and fabric (test first).

Fun and easy to use

Plaster Roll Ready to Use - Non-Toxic

10cm x 4.5m

Fast drying plaster impregnated bandage. Safe for mask making directly onto the face. Plaster bandage that can be used for modelling, casting and crafting. Measures 100mm x 4.5m

INSTRUCTIONS FOR MAKING A FACE MASK:

- 1 Tie back long hair and apply a liberal coating of Vaseline around the hair line, including eyebrows.
- 2 Cut the plaster roll into lengths of approx 50-100 mm.
- 3 Dunk the plaster roll strips into a bowl of room temperature water and squeeze out excess water.
- 4 Place the strips onto the face, starting at the top and work around the perimeter, overlapping the strips.
- 5 Build up until you have several layers.
- 6 After 30-40 minutes, the mask will start pulling away from the face, at which time the mask can be removed.
- 7 Leave to dry for approximately one day.
- 8 Paint and decorate.

Bottle

High Performance

PVA General Purpose

High performance all purpose ready to use PVA glue. Transparent when dry and can be painted over. Use for wood textiles card and paper. Check suitability for intended use. When gluing wood apply glue to both surfaces and clamp for at least 30 min.

Sizes: 2 Litre, 250ml and 125ml

Powder Paste Glue
Concentrated add Water

500gram

School Cellulose Paste

Cellulose powder glue in granular form. Mix with water to form a thick paste ideal for gluing paper card and paper mache work. Can also be used to extend paints and glues.

MIXING INSTRUCTIONS

- Use 10 g of granules to 1 litre of water (adjust to desired thickness). Sprinkle the cellulose granules into cold water while stirring briskly for 30-60 seconds. Leave to stand for 30 min – re-stir thoroughly and it's ready to use.

500gram

All Purpose Paste

Powdered glue for paper and card. Ideal for use in schools, kindergartens hobby and craft activities. Mix with water to form a thick smooth paste. It can also be used to extend paints and glues.

MIXING INSTRUCTIONS

Use 3 heaped dessert spoons (30 g) of powder to 1 litre of water (adjust to desired thickness). Sprinkle the powder into cold water while stirring briskly for 30 seconds. Leave to stand for 30 min – re-stir thoroughly, and it's ready to use (it will continue to thicken overnight).

Our step-by-step "Bright Idea" sheets make it easy for you to get creative!

Creativity is an important element for all ages to develop mental and motor skills which encourages problem solving and "outside the box" thinking skills.

These Bright Ideas have different ability levels from easy to more difficult and are definitely achievable for the inexperienced artist.

Each sheet has a shopping list of products, easy to follow instructions with pictures, to make some pretty cool artworks.
